

DS 785: Capstone Course

Project Approval Form

The Capstone project provides an example of the culmination of work in the Data Science program. The University of Wisconsin MS Data Science program and its agents may request permission to use this project as part of its recruiting and public relations efforts, in which case the University of Wisconsin will seek prior review and approval of those named on this form. The University of Wisconsin will not use financial data or proprietary information from client-based Capstone Projects, but will summarize the project and may use this summary for recruitment and publicity purposes. This summary may include the use of images (whether still, motion picture, or video), voice recordings, and name of the student/client/client organization/instructor. Questions regarding this Approval form should be directed to the Capstone course instructor. There is no compensation associated with the use of the project by the University of Wisconsin Data Science program.

In order to complete the academic requirements for the DS 785 Data Science course, I have created the attached project description including a summary of items that will be addressed in my data science Capstone project, along with a timeline that indicates proposed dates/deadlines for each week.

Student Name: Spencer Swartz

Campus: University of Wisconsin - La Crosse

Phone: 641-750-3866

Email: spencer.swartz@gmail.com

Student Signature/Date: _____

My signature below attests to my acceptance of this project and willingness to participate as outlined in the Project Proposal.

Client: (if applicable to project or if creating a business plan, student signs here also)

Organization:

Address:

Phone:

Email:

Signature/Date: _____

Instructor: Ethan Christensen, Ph.D.

Campus: University of Wisconsin-Superior

Phone: 715-394-8431

Email: echris22@uwsuper.edu

Signature/Date: _____
